AGENDA

- Feedback for sprint 0

OPEN ISSUES

- Use Microsoft for registration, as student accounts use that.
- Sprint Backlog needs editing with certain acceptance criteria being removed and shortened; update status of each sprint backlog ID.
- Try to lessen tasks as only 2 sprints are left - don't overwork or rush with just an adequate end-product.
- Coding needs to commence with all members onboard.
- Research how to get email code working - Restful APIs won't work - be specific.
- ERD - edit certain entities.

NEW BUSINESS

- A release plan for the project is required.
- Mr Vanker needs to be spoken to regularly for feedback, especially with way-forward for coding.
- Project scope needs to be descriptive of what the project is about.
- Product backlog is essential and needed for sprints.
