AGENDA

- Sprint 0 feedback and consultation

PRODUCT BACKLOG

- Research types of user + non-user stories and divide into various sprint (not just sprint 0).
- Stories for sprint 0 will relate to what's needed for the PB.
- Acceptance criteria needs to be more detailed and not vague - needs to be coded by any dev and not an assigned person.
- **Comments and actual effort need to be taken out.**
- Estimated efforts need to be in place for all sprints and what happens if the story is incomplete.
- Condense all login stories - DO NOT separate users.
- Have 1 type of login - Microsoft account
- Organize priorities in ascending order (high - low).
- "MVP" for high-priority across all user stories.
- One goal allowed per story (not more, otherwise it's too long).
- User stories need to be simplified, clear and specific.
